INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

REC'D 27 AUG 2003

WIPO

PCT

10 SEP 2004

Applicant's or agent's file reference 114033/JMD	FOR FURTHER ACTION	See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416).
International Application No. PCT/AU03/00300	International Filing Date (day/month/year) 13 March 2003	Priority Date (day/month/year) 13 March 2002
International Patent Classification (IPC) or national classification and IPC Int. Cl. ⁷ G01N 33/68, C07K 1/28, C12Q 1/37		
Applicant PROTEOME SYSTEMS INTELLECTUAL PROPERTY PTY LTD et al		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 3 sheets, including this cover sheet.

☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of sheet(s).

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 4 August 2003	Date of completion of the report 13 August 2003
Name and mailing address of the IPEA/AU AUSTRALIAN PATENT OFFICE PO BOX 200, WODEN ACT 2606, AUSTRALIA E-mail address: pct@ipaaustralia.gov.au Facsimile No. (02) 6285 3929	Authorized Officer GARETH COOK Telephone No. (02) 6283 2541

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/AU03/00300

I. Basis of the report**1. With regard to the elements of the international application:***

- ☒ the international application as originally filed.
- ☐ the description, pages , as originally filed,
pages , filed with the demand,
pages , received on with the letter of
- ☐ the claims, pages , as originally filed,
pages , as amended (together with any statement) under Article 19,
pages , filed with the demand,
pages , received on with the letter of
- ☐ the drawings, pages , as originally filed,
pages , filed with the demand,
pages , received on with the letter of
- ☐ the sequence listing part of the description:
pages , as originally filed
pages , filed with the demand
pages , received on with the letter of

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages
- ☐ the claims, Nos.
- ☐ the drawings, sheets/fig.

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/AU03/00300

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims 1-13	YES
	Claims	NO
Inventive step (IS)	Claims 1-13	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-13	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

The following documents identified in the International Search Report have been considered for the purposes of this report:

- D1 Perkins DN *et al*, *Electrophoresis*, 1999, 20:3551-3567
- D2 Yates JR III *et al*, *analytical Chemistry*, 1995, 67:3202-3210
- D3 Choudhary JS *et al*, *Proteomics*, 2001, 1:651-667
- D4 Küster B *et al*, *Proteomics* 2001, 1:641-650
- D5 Jungblut PR *et al*, *Infection and Immunity*, 2001, 69(9):5905-5907

Novelty (N) and Inventive Step (IS) claims 1 to 13

The claimed invention is to a method of identifying ORFs in an unannotated DNA sequence, involving performing a six frame translation on the DNA sequence, determining the theoretical digest products of each translation and comparing with empirical digest products, whereby either the DNA sequence or the translation is divided into regular segments, and a significant number of matching theoretical and empirical digestion products in one segment indicates an ORF in that segment. The prior art discloses the six frame translation and comparison of theoretical digestion of the translation products with empirical digests to identify ORFs. The prior art does not disclose the division of the DNA sequence or its translation products into regular segments, nor is it considered that this would be an obvious improvement over the prior art. The claims therefore meet the requirements of Articles 33(2) and 33(3) of the PCT.

Industrial Applicability (IA) claims 1 to 13

The claimed invention meets the requirements of Article 33(4) of the PCT.
